

Milestone 1: MotorPH Employee App GUI Documentation

The screenshot shows a window titled "MotorPH Employee App" with a close button (X) in the top right corner. The window contains the text "Enter employee details below." and three input fields. The first field, labeled "Employee Number:", contains the text "fdg". The second field, labeled "Employee Name:", contains the text "sdf". The third field, labeled "Pay Coverage:", is empty. Below the input fields are two buttons: "Submit Employee Info" and "Clear Fields".

-
- Tested to see if the submit employee info is clickable if all three fields are not filled.
 - Tested to see if employee number is invalid
 - Tested to see if all three fields are invalid
 - Tested to see what would happen if pay coverage is negative

Refinement notes : Enhanced the MotorPH Employee App interface by improving the layout, spacing, labels, and button text to make the form clearer and easier to use. I also added an instruction label and tooltips so users can better understand what each input field requires. The Submit button is disabled until all required fields are filled, which helps prevent incomplete submissions. I also kept friendly confirmation and error messages using dialog boxes so users receive immediate feedback after each action. These changes improve the app's clarity, consistency, feedback, and overall usability.
